High-Powered Moisture Mini-Sensors

The compact M-i moisture monitor from Meeco, Inc. is the first mini P_2O_5 -based moisture monitor. Offering proven stability, precision and repeatability, the absolute moisture monitor packs high-powered clean technology into a small and low-cost package. Suited for fixed gas applications, the M-i measures a range of 500 ppb to 1000 ppm. Utilizing MEECO's proven electrolytic technology, the device is palm-sized and provides continuous, no-drift, on-line moisture analysis.
