

We wish to support our many friends in the Lone Star State in this time of crisis. In consideration of the more than 7 million people still without potable water and untold damage to the energy infrastructure, MEECO and its team are raising funds for the Texas Salvation Army, which is providing emergency resources to communities in need. Please join us by donating to: www.salvationarmytexas.org

For our customers, if you require emergency analytical equipment to monitor moisture in your natural gas lines, we can help with special arrangements. Please contact us at PipelineProtection@meeco.com
