Moisture Analyzer Manufacturer Expands Global Network

November 3, 2010

MEECO Inc., a leading manufacturer of moisture analyzers, announced it has broadened its global network by establishing partnerships with four new distributors in Europe. MEECO's new distributors include **Bernt Messtechnik GmbH** in Germany, **APT** in Italy, **SPA (Systemy Pomiarowo-Analityczne)** in Poland, and **OmniProcess AB** in Sweden.

"As the trusted name in moisture analysis for 62 years, our customers know we have a well established distribution network to support their moisture analysis needs," says Lisa Bergson, MEECO chief executive. "We are proud to add Bernt Messtechnik GmbH, APT, SPA, and OmniProcess AB to the MEECO family of world-class distributors."

In the gas industry, the MEECO name is synonymous with moisture analysis. The MEECO family of moisture analyzers provides precise, on-line moisture monitoring for utilities; chemicals/petrochemicals; and natural, medical and highpurity gases.
